

Type	Temperature C			Temperature F		
	Min	Ideal	Max	Min	Ideal	Max
Koi*	4	18	26	39	64.5	78.8
Pond*	4	18	26	39	64.5	78.8
Coldwater aquarium*	10	18	26	50	64.5	78.8
Tropical aquarium	23	24.5	26	73	76	78.8
Discus	27	29	31	81	84	88
Cichlid	23	24.5	26	73	76	78.8
Fish only marine aquarium	23	24.5	27	73	76	78.8
Reef aquarium	23	24.5	26	73	76	78.8

* At temperatures below 12C/55F you should stop feeding your fish, and at temperatures above 12C/55F you should slowly start feeding again.

Temperature control is essential for the health of your fish. A surge in temperature can increase free ammonia levels, decreasing oxygen, and lead to high levels of bacteria that could lead to an unhealthy aquarium.
