

First-time fish keeper or experienced hobbyist looking for some advice? You have come to the right place.

In this section of seneye answers, you'll find all you need to know about setting up and looking after your pond as well as monitoring it with a seneye usb device.

The seneye usb device monitors life critical parameters such as pH, water level, temperature and free ammonia.

Furthermore, you will be alerted as soon as one of these all important factors changes so immediate action can be taken to save your fish's lives!
